

## DHWA Investment Update 2009

Vol. # 2

### What Do Great Investment Minds Think?

In these unique economic times, Dixon Hughes Wealth Advisors is continuously looking for objective input to view the "big picture" of the financial markets. As a fee-only Registered Investment Advisor, we can search all sources, without being connected or subservient to any entity.

We have recently found an interesting presentation that matches the outlook of some of the industry's great minds, with interesting research that supports their opinions. This communication was developed by an actively managed mutual fund company by the name of Davis Advisors, and although we do not use Davis funds in our portfolios, nor espouse their actively managed philosophy, we do believe they have offered an excellent source of information.

Visit <http://www.davisfunds.com/pdf/DWGI2Q08.pdf> for their PDF presentation - "The Wisdom of Great Investors."

As always, we are available to discuss this or any topic you may have an interest in.

Sincerely,

Dixon Hughes Wealth Advisors
